

Visit to Bedford Girls' School

We were thrilled to be invited into Bedford Girls' School to deliver a taster session introducing Augmented and Virtual Reality to 18 of their Year 9 and 10 students.

Using iPhones, they were able to bring Father Christmas, a Christmas tree and a football-playing dinosaur to life, as well as try out HoloLens headsets!

Following the session, James Potter, Director of Digital Strategy and Head of Computer Science at the school, said "It was great for the girls to see people outside of the school talking so well about the future uses for computer science and how important it is for them to get involved in the industry."
