

THE UNIVERSITY OF
BUCKINGHAM

Engaging *minds*

University-led sessions
for your school

Inspiring futures

Are you looking to provide your students with hands-on experience and valuable insights to help them make informed decisions about their future?

At The University of Buckingham, we understand the importance of inspiring and supporting students as they explore their academic and career pathways.

Our academics, who are leaders in their fields, are available to deliver engaging and interactive workshops or seminars tailored to your students' needs. These sessions can take place either at your school or at our beautiful campus in Buckingham, offering a unique opportunity for students to deepen their understanding, develop new skills, and gain valuable exposure to different disciplines.

Our sessions are designed to spark curiosity, encourage critical thinking, and provide practical insights into a variety of subjects.

Whether they are interested in business, computing, humanities and social sciences, law, medicine or psychology, we offer a diverse range of topics to suit different interests and aspirations.

Accounting & Finance

Business

Computing

English Literature

Economics

Digital Media & Journalism

History & History of Art

Law

Medicine & Health Sciences

Politics

Psychology

Got a topic in mind that we could help with? Drop us a line at marketing@buckingham.ac.uk, and we'll see what we can do!

Sessions in Business

From understanding the principles of sustainability and project management to exploring careers in accounting, these sessions are designed to inspire students and provide practical insights into the world of business.

We offer a range of sessions that dive into consumer behaviour, examining how decisions and buying patterns shape industries, as well as exploring social entrepreneurship and how innovative solutions can create real-world impact.

Hosted by expert academics, these seminars and workshops offer students valuable knowledge and skills to help them navigate and succeed in today's rapidly evolving business landscape.

	Topic	Target audience	Location
WORKSHOPS	A Serious Game: Sustainable Cocoa Challenge	Years 12 to 13	Any
	Accounting in Practice: Exploring Careers and Opportunities in Accounting	Years 12 to 13	Any
	Social Entrepreneurship: Creating Impactful Solutions for Society	Years 12 to 13	Any

Sessions in Computing

Engage in hands-on sessions that explore the latest in technology, innovation, and problem solving.

From understanding the power of AI for sustainability to diving into robotics, coding, and cybersecurity, our computing sessions are designed to inspire and equip students with the skills needed to thrive in the digital future.

Students can explore everything from programming and app development to cutting-edge topics like quantum computing and data visualisation.

This is an exciting chance to discover the endless possibilities in tech and STEM, and to see first-hand how these fields are shaping the future.

BOOK A SESSION

Sessions in Psychology

Deep dive into a specific area of psychology through immersive activities and expert-led discussions.

Whether exploring qualitative or quantitative research methods, examining personality assessment, or engaging in unique tasks like the Mirror Drawing Task or Rubber Hand Illusion, each session offers a focused, interactive experience.

Students can also explore topics like forensic psychology, risk-taking behaviour, creativity in problem solving, or the impact of technology on human interactions through cyberpsychology.

These sessions provide valuable insights into the complexities of human behaviour and cognition, helping students gain a deeper understanding of psychology in action.

Sessions in Law

Our law sessions provide students with the opportunity to develop key skills and insights essential for a successful career in law and criminal justice.

Through practical activities and expert-led guidance, students will gain a deeper understanding of the legal profession, enhance their employability, and explore various pathways into legal and criminal justice careers.

The sessions focus on building foundational skills, boosting career prospects, and offering hands-on experiences like mock trials, allowing students to step into the courtroom and experience the legal process first-hand. These opportunities are designed to provide invaluable professional development and prepare students for success in the field.

	Topic	Target audience	Location
WORKSHOPS	Law Employability and Criminology: Pathways to a Career in Legal and Criminal Justice	Years 10 to 12	Any
	Law Employability: Enhancing Career Prospects in the Legal Field	Years 10 to 12	Any
	Mock Trial: Experience the Courtroom and Develop Legal Skills	Years 10 to 12	University
	Professional Development in Law: Building Skills for Success	Years 12 to 13	Any

Sessions in Medicine and Health

Our sessions offer students an in-depth look at the medical field, blending practical skills with career insights

Topics are available to cover medical training through simulations, developing a growth mindset for academic and professional success, and gaining practical experience in healthcare settings. We also cover the medical school application process, interview strategies, and the variety of career options within medicine.

There is also the opportunity to focus on essential medical skills like CPR, blood pressure measurement, and communication, alongside discussions on ethics, sustainability in healthcare, and global challenges in medicine.

Alongside of this, we're offering the chance to shadow medical professionals, gain insight into the life of a GP, and explore creative learning methods in anatomy and physiology.
